

Consent for Classroom Photography/Videotaping (student)

The Speech-Language Pathologists (SLP team) of the Upper Canada District School Board are involved in an exciting project exploring the use of technology in the classroom. We are working closely with Bridges Canada. Bridges Canada provides the technology training to our staff and students for this project.

Your child's classroom is equipped with a SMART Board. In order to measure the effectiveness of this technology, and to assist with training, we would like to photograph and/or videotape students and teachers in the classroom using the SMART Board. By signing this consent form, you give the Upper Canada District School Board and Bridges Canada permission to include your child in photographs and/or videotapes of SMART Board use in the classroom. The images (photos and/or videos) will be used solely for educational purposes – presentations to school staff, school board committees, conferences, and/or at training sessions. Children will never be identified by their full name or their school name/location when images are shown. Images will not be distributed (copied) beyond viewing, and will not reside on any permanent media (i.e., newspaper advertisements, brochures, blogs, wikis, web pages) without further consent being secured for that purpose.

I give permission for UCDSB SLP Team to photograph and/or videotape my child for the purposes of sharing educational information.

Student's name _____

School _____

Date _____

Signature of Parent/Guardian _____
